## SUMMARY

Front End Developer with internship experience at Cod Soft, specializing in React JS, Tailwind CSS, Next JS, JavaScript, HTML, and CSS, and proven ability to create responsive and user-friendly interfaces. Successfully contributed to dynamic projects with a strong attention to detail and dedication to high-quality solutions. Skilled in collaborating effectively within team environments. Eager to utilize and expand expertise in innovative projects for personal and career growth.

## PROJECTS

### Panaverse Dao Clone

- Implemented a clean and responsive user interface adhering to Figma design specifications.
- Utilized Next.js for efficient and scalable structure and logic.
- Styled the application using Tailwind CSS to ensure a modern, consistent, and visually appealing design.
- Collaborated with designers and stakeholders to ensure accurate implementation of visual and functional requirements.
- Optimized performance and accessibility to enhance user experience.

### VirtualR landing Page

- Developed a responsive landing page for VirtualR using Next.js for structure and logic, and Tailwind CSS for styling, ensuring 100% similarity to the Figma design.
- Implemented pixel-perfect design, achieving complete alignment with the original UI/UX specifications.
- Optimized page performance and SEO for fast loading and improved user experience.
- Followed best practices in responsive design and accessibility for a seamless user experience across devices

### To-Do App

- Developed a fully functional TO-Do App using HTML for structure, CSS for styling, and JavaScript for dynamic logic.
- Achieved 100% of the planned functionality, including task creation, deletion, and completion tracking.
- Ensured a user-friendly interface with responsive design, improving accessibility across devices.
- Focused on clean, maintainable code and optimized app performance for seamless user interaction.

### Simple Calculator

- Built a fully functional calculator app using HTML for structure, CSS for styling, and JavaScript for logic and interactive features.
- Successfully implemented all basic operations (addition, subtraction, multiplication, division), achieving 100% of the planned functionality.
- Focused on creating a clean, intuitive user interface with responsive design for seamless use on both mobile and desktop devices.
- Ensured cross-browser compatibility and optimized performance for a smooth user experience.

### Expense Tracker

- Developed a fully functional expense tracker app using HTML for structure, CSS for styling, and JavaScript for dynamic logic.
- Achieved 100% of the planned functionality, including features like adding, editing, and deleting expenses, as well as real-time expense tracking and balance updates.
- Designed a user-friendly and responsive interface, ensuring compatibility across different devices and screen sizes.

### Weather App

- Developed a real-time weather tracking app using HTML for structure, CSS for styling, and JavaScript for logic and interactivity.
- Achieved 100% successful API integration for real-time weather data from external sources, allowing users to view current weather conditions based on location.
- Implemented features such as temperature, humidity, and wind speed display, along with a responsive design for mobile and desktop users.

## WORK EXPERIENCE

### **CodSoft**

Front End Developer (Intern)

Mar 2024 - Apr 2024

Remote

## EDUCATION

### **Mehran University of Engineering and Technology**

B. E Telecommunication Engineering

Nov 2016 - Jun 2021

Jamshoro, Pakistan

## SKILLS

- HTML5, CSS3, Tailwind CSS, JavaScript, Typescript, ReactJS, Next.js, GitHub, Responsive Design.
